

# How Do You Want to Present Your Culinary Creations?

Featuring the newly redesigned Mega-Meal™ 80oz. and 100oz. capacities, holding up to 6 pounds. Half steam table pan footprint. 40% natural materials.

## The New Mega-Meal Half-Steam Pan from Anchor

**2 BIG SIZES:** 80oz. (5lbs) and 100oz. (6lbs) capacities. Standard half steam table pan footprint. Despite their size and capacity, these containers are easier to handle than their aluminum counterparts. Tabbed corners facilitate easy removal of the leak-resistant lid. Advanced engineering techniques in both the base and lid, and **40% natural materials** in the base, results in a large reduction in petroleum-based resins, while providing a structurally stronger container. Stacks up to 3 high, saving on space during staging and transport.

**HEAT-TOLERANT:** Will withstand temperatures up to 230°F when used under heat lamps, in warming units, and in hot boxes.\* Microwave-safe. And cool to the touch flanges facilitate easy lifting.

**BETTER PRESENTATION:** With clear vented, anti-fogging lids, the new Mega-Meal provides for much better visibility than similar containers of its size with foil or board lids. And a durable classic black tray shows off culinary items better. Both tray and lid are tear and puncture-resistant, with the newly designed lid providing a secure fit, and leak-resistance during the transport to the event without spills or messes.

**CONSUMER REUSABLE:** An added bonus for the consumer. It's Dish-washer-safe, made of durable  polypropylene—the same material used in reusable food storage containers sold in stores. Eligible for recycling.

Anchor products are BPA-free.

\*not sterno or fire-resistant.
