Affordable Solutions with Improved Performance

Attractive Presentation and Eliminates Order Errors

Black bases highlight the food and secure, clear lids preserve the presentation with food visibility to eliminate order errors. Anti-fog, vented lids keep food looking fresh & appealing with that "just made" appearance. No re-plating necessary with a table-ready presentation; heat & eat in the same container.

Leak Resistant and Consumer Convenient

Durable, cut resistant polypropylene bases with leak-resistant lids prevent messy spills for an enjoyable take-out experience. Easy opening tabs and re-close features allow consumer to store leftovers.

High Heat Performance

Packages withstand temperatures up to 230°F when used with hot food, under heat lamps or in the microwave. No off-odors or off-flavors during heating like some polystyrene containers.

Reusable and Recyclable – Curbside

Polypropylene bases and lids are dishwasher safe and consumer reusable multiple times. Packages remain recyclable after multiple uses.
