Subject: Ozone Depletion Compliance: Polypropylene Containers

Date: January 4, 2023

This letter is in regard to EPA Ozone Depleting Substance information for Polypropylene-based food packaging containers manufactured by Anchor Packaging.

We can certify that, to the best of our knowledge, no Class I or Class II Ozone Depleting Substances, such as “chlorofluorocarbons (CFCs), halons, carbon tetrachloride, or methyl chloroform,” are used in the manufacture of our Polypropylene-based food packaging containers.

Anchor Packaging is a processor of Polypropylene (PP) and colorant materials and induces no changes that would affect compliance with Ozone Depletion Compliance regulations.

Anchor relies on good faith with its suppliers and guarantees compliance of the products as described above up to the time the products are shipped. Thereafter, it is the responsibility of the customer to assure that all applicable conditions and specifications outlined under the above-mentioned regulatory categories are maintained.
